

### AMENDMENTS TO THE SPECIFICATION

Please amend the specification at page 5, line 5, as indicated below:

-- Brief Description of the Drawings

Fig. 1 shows a miniplant for carrying out continuous hydroformylations consisting of two autoclaves with lifting stirrer connected in series (1 and 2), a pressure separator (3), a flash stripping column (4), and an ion exchanger bed (5).

Fig. 2 shows a miniplant for carrying out continuous hydroformylations. This consists of two autoclaves with lifting stirrer connected in series (1 and 2), a pressure separator (3), a heated depressurization vessel for separating off C<sub>4</sub>-hydrocarbons (4), a wiped film evaporator (5), and an ion exchanger bed (6). --
